

Bosch

CNOS-FAP and **BOSCH** consider the school and Vocational Training as a key factor for the development of civil society and identify the interaction between education, Vocational Training and the world of production and work as the most suitable way to provide high quality services of education and training aiming at raising Italian cultural level. **CNOS-FAP** and **BOSCH** work together to strengthen the educational, cultural and professional growth of young people, in accordance with the needs and expectations of the labour market; in this framework **CNOS-FAP** and **BOSCH** have considered strategic innovation of the professional area “Mechanical engineer, Machineries and Constructions”, because it was deemed not totally appropriate to the working world needs, with particular reference to the figure of professional hydrothermal systems installer .

A Memorandum of Agreement was signed on November 7, 2014.
