

ICT CHALLENGES IN LEARNING MOBILITY

Applicant Organisation: CONFAP- SCF

Partners: CNOS-FAP

Objectives: The project aims at sensitizing and familiarizing VET trainers to start using multimedia and information technologies in the everyday classroom. Trainers will be able to implement methodological procedures alternative to those of traditional learning. This methodology will have an impact on young people with difficulties, those who risk dropping out of school or those who already have experience with early school living. Moreover, it will provide trainers with an opportunity to promote a conscious and anti-discriminatory use of technology. Thanks to the skills acquired, trainers will be able to make learning more attractive. The mobility charter for CNOS-FAP will be 8 but it could be extended to a maximum of 15 trainers.

Programma:

Erasmus+ KA1

Categoria progetto:

Europeo / Internazionale

Anno di avvio:

2015

Stato:

Chiuso
